Behind the smile
THERE'S A STORY
Let's talk about it

Tuscola Behavioral Health Systems

Feelings of sadness are common human emotions. When more severe symptoms like lack of energy and hopelessness develop in multiple areas of a person's life along with persistent sadness over at least two weeks, they may be experiencing a condition known as major depressive disorder (MDD).

Depression does not have a single cause. Symptoms can begin to appear following a life crisis, physical illness or something else - but they can also occur for no reason at all. (Source: NAMI)

If you think someone is showing signs of depression, talk to them. It can make a difference!

Offering your support sends a powerful message that they are not alone. No one should feel alone in their mental health journey or without resources and support.
