DEPRESSION & ANXIETY

Tuscola Behavioral Health Systems
www.tbhsonline.com 1.800.462.6814

Depressive disorder, frequently referred to as depression, is more than just feeling sad or going through a rough patch. It's a serious mental health condition that requires understanding and medical care. Left untreated, depression can be devastating for those who have it and their families. Fortunately, with early detection, diagnosis and a treatment plan and healthy lifestyle choices, many people can and do get better.

Anxiety disorders are the most common mental health concern in the United States. Over 40 million adults in the U.S. (19.1%) have an anxiety disorder. Meanwhile, approximately 7% of children aged 3-17 experience issues with anxiety each year. Most people develop symptoms before age 21. Source: NAMI
