Supporting Recovery

When a friend or family member develops a mental health condition, it's important to know that you're not alone. Family members and caregivers often play a large role in helping and supporting the millions of people in the U.S. who experience mental health conditions each year.

What can family and friends do?

- Learn as much as possible about mental health.
- Show interest in the persons treatment plan and encourage the person to follow it.
- Listen carefully. Simply listening is one of the best ways to show your support.
- Resume "normal" activities and routines. Spend time together on activities unconnected to their illness.
- Don't push too hard. It takes time to heal and ease back into routine activities.
- Express your support out loud. State that you want to help and they are not alone. 1 in 5 US adults experience mental illness each year.
- Don't give up on the person. A person with a mental health condition benefits from having a social support. A good life is possible. Source: NAMI
