**Why you need dental insurance in retirement.**

**Medicare doesn't pay for dental care.<sup>1</sup>**

As good as Medicare is, it was never meant to cover everything. If you want protection, you need to purchase individual insurance.

**Early detection can prevent small problems from becoming expensive ones.**

The best way to avoid large dental bills is preventive care. Experts recommend checkups twice a year.

**Previous dental work can wear out.**

Your odds of having a dental problem only go up as you age.<sup>2</sup>

**Treatment is expensive — especially the services people over 50 often need.**

Unexpected bills, like \$190 for a filling, or \$1,213 for a crown<sup>3</sup> can be a real burden, especially if you're on a fixed income.

**When you're comparing plans ...**

- ▶ Look for coverage that helps pay for major services.
- ▶ Look for coverage with no deductibles.
- ▶ Shop for coverage with no annual maximum on cash benefits.

**Simply put – without dental insurance, there may be an important gap in your healthcare coverage.**
